IMPORTANT SAFETY INFORMATION: READ THE FOLLOWING WARNINGS BEFORE YOU OR YOUR CHILD PLAY VIDEO GAMES

- Some people (about 1 in 4000) may have seizures or blackouts triggered by light flashes or patterns, such as while watching TV or playing video games, even if they have never had a seizure before.
- Anyone who has had a seizure, loss of awareness, or other symptom linked to an epileptic condition should consult
  a doctor before playing a video game.
- Parents should watch when their children play video games. Stop playing and consult a doctor if you or your child have any of the following symptoms:

Convulsions
Altered vision

Eye or muscle twitching Involuntary movements

Loss of awareness Disorientation

To reduce the likelihood of a seizure when playing video games:

- 1. Sit or stand as far from the screen as possible.
- 2. Play video games on the smallest available television screen.
- 3. Do not play if you are tired or need sleep.
- 4. Play in a well-lit room.
- 5. Take a 10 to 15 minute break every hour.

# **WARNING** - Repetitive Motion Injuries and Eyestrain

Playing video games can make your muscles, joints, skin or eyes hurt after a few hours. Follow these instructions to avoid problems such as tendinitis, carpal tunnel syndrome, skin irritation or eyestrain:

- Avoid excessive play. It is recommended that parents monitor their children for appropriate play.
- Take a 10 to 15 minute break every hour, even if you don't think you need it.
- If your hands, wrists or arms or eyes become tired or sore while playing, stop and rest them for several hours before playing again.
- If you continue to have sore hands, wrists or arms or eyes during or after play, stop playing and see a doctor.

# **WARNING - Battery Leakage**

Leakage of battery acid can cause personal injury as well as damage to your Game Boy. If battery leakage occurs, thoroughly wash the affected skin and clothes. Keep battery acid away from your eyes and mouth. Leaking batteries may make popping sounds.

To avoid battery leakage:

- Do not mix used and new batteries (replace all batteries at the same time).
- Do not mix alkaline and carbon zinc batteries.
- Do not mix different brands of batteries.
- Do not use nickel cadmium batteries.
- Do not leave used batteries in the Game Boy. When the batteries are losing their charge, the power light may become dim, the game sounds may become weak, or the display screen may be blank. When this happens, promptly replace all used batteries with new batteries.
- Do not leave batteries in the Game Boy or accessory for long periods of non-use.
- Do not leave the power switch on after the batteries have lost their charge. When you finish using the Game Boy, always slide the power switch OFF.
- · Do not recharge the batteries.
- Do not put the batteries in backwards. Make sure that the positive (+) and negative (-) ends are facing in the
  correct directions. Insert the negative end first. When removing batteries, remove the positive end first.
- · Do not dispose of batteries in a fire.

Large Heart – These larger hearts return you to maximum hit points.

Dino Claw – Collect 10 Dino Claws and you can summon your DinoZord to wipe out every enemy on the screen.

Gems – The color of the gem depends on how you defeat your opponent. Defeat an enemy with a jumping or weapon attack to earn a yellow gem worth 10 points. If you defeat an enemy with a combo punch attack, you earn a blue gem worth 50 points.

Defeat an enemy with a DinoZord attack to earn a red gem worth 100 points!

When a stage is completed, the Stage Complete Screen will appear showing the time it took to complete the stage, number of Dino Claws and Gems collected, your score, any bonuses, and ranking (A, B, or C). Press the Button to advance to the next stage.

#### Mini-Game

Timer

Dino Claw Icon

Tile Selection Grid

Timer – The Timer at the top shows how long you have to get the Black Ranger to the DinoZord Arm.

Dino Claw Icon – The Dino Claw icons show how many tries you have left.

Tile Selection Grid – The white dotted outline shows the group of tiles that will move.

NOTE: When you run out of time or tries, the Mini-Game is over.

There will be times during your missions when a DinoZord will appear while all the Rangers are deep in battle. You can use different DinoZords as arms for better attacks against enemies (for more on Megazord Battles, see page 13). When this happens, Dr. Oliver, the Black Ranger, will chase it down. It's up to you to guide him to the DinoZord.

Press START to get the Black Ranger on his way. Once the countdown says "GO," Dr. Oliver starts to move along the route shown on the tiles in front of him. Use the Control Pad to highlight a tile while holding the Button — the group of tiles that will move by sliding this tile are indicated by a white dotted outline.

Slide the row or column the tile is on by pressing the appropriate direction on the Control Pad. You can move any row or column that the Black Ranger isn't currently on. When the Black Ranger crosses over a tile, it flips over. When it flips back, it will become either a piece of track or a random bonus/penalty.

#### **Bonus Tiles**

Extra Time - Gives you more time to finish the Mini-Game.

Extra Tries - Gives you more tries to complete the Mini-Game.

Slower Black Ranger – Black Ranger slows down to give you more time to move tiles ahead of him.

# **Penalty Tiles**

Faster Ranger – Black Ranger speeds up, giving you less time to move tiles ahead of him.

Control Invert – The controls are backwards! Pressing UP makes your tiles slide down, LEFT makes them slide right, etc.

Less Time – Gives you less time to finish the Mini-Game.

Tile Shift - Makes all of the unoccupied tiles change.

The Megazord Icon – Changes the location of the Finish Tile.

Feather Icon – Puts the Black Ranger at the beginning of the Mini-Game.

### Megazord Battles

When it's time to combine the DinoZords to form Thundersaurus Megazord, the Zord Selection Screen will appear.

# Thundersaurus Megazord

The Thundersaurus Megazord can be outfitted with the DinoZords you have collected for your impending Megazord battle. Use the Control Pad and the Button to select a DinoZord for each arm. Each DinoZord arm you pick has a different attack, defense, speed, and combo ability. Also, some arms work better together than others, which makes landing a deadly combo attack easier. See the chart on the following page for information on the available Megazord arms. When you've chosen both DinoZord arms, the Megazord battle will begin!

Right Arm

Zord	Defense	Attack	Speed	Combo	Difficulty	Best Match	Worst Match
Tricera	**	**	**	**	Harder	TyrannoZord	DimetroZord
Cephala			***		Easier	DimetroZord	ParasaurZord
Ankylo	***	***			Harder	ParasaurZord	TyrannoZord

# Left Arm

Zord	Defense	Attack	Speed	Combo	Difficulty	Best Match	Worst Match
Tyranno	**	***	**		Easier	TriceraZord	AnkyloZord
Dimetro	**	***	7		Easier	CephalaZord	TriceraZord
Parasaur			***		Harder	AnkyloZord	CephalaZord

Once the Megazord battle beings, two HP Meters appear on the top and the bottom of the screen. The two on top are for each of Thundersaurus Megazord's arms — when one is depleted, the arm becomes disabled. If both HP Meters are completely drained, you lose the battle. The Enemy Megazord's HP meters are on the bottom of the screen. See the Megazord Battle Controls on page 6 for information on basic Thundersaurus Megazord controls.

Combo Attacks can be done by alternating left and right arm attacks ( and Buttons). A Combo Attack is more likely to happen if you have made a good DinoZord arm match (see the chart on page 14).

To unleash a deadly Combo Attack, try the following button combinations.

TyrannoZord: (a), (b), (a), (b), (b)

DimetroZord: 0, 0, 0, 0

ParasaurZord: (a), (b), (b), (b), (b), (c)

TriceraZord: 10, 10, 10, 10

CephalaZord: 3, 0, 3, 0

AnkyloZord: 10, 10, 10, 10, 10

When the Megazords get too close, they will grapple and the stronger Zord will do damage to the loser. Press the © Button as fast as you can to bring the Thundersaurus Megazord out on top!

# SAVING AND LOADING

Power Rangers Dino Thunder<sup>TM</sup> uses a password system to save and load the game data.

Saving a Game

Press START at any time to access the Pause Menu. The LEVEL PASSWORD for the current level is shown on the Pause Menu. Be sure to write the password down exactly as it is shown for future reference! You will not be able to return to the game if the password is incorrect.

### Loading a Game

To load a previously saved game, select PASSWORD from the Main Menu. Now use the Control Pad to highlight a letter and press the Button. Continue selecting letters until the password is complete.

If correct, you will return to the beginning of the level at the point where the game was saved. If incorrect, you will have to enter the password correctly.

# TIP5

• Be careful busting open crates and drums — you never know when a Tyrannodrone might pop out or if you might find something to help you!

• Discretion can be the better part of valor — you can jump over enemies to advance.

- Using your weapon can open you up to attack. Think about the timing of your weapon attack.
- Wait until there is a maximum number of enemies on screen before calling in your DinoZord. This will maximize your attack!
- During a Megazord Battle, watch the opposing Megazord when it's about to attack, block!
- Use the Megazord Arm chart (on page 14) to pick the best combination of arms!
